

## Accelario for Financial Services

Empowering Finance & Banking with an Advanced Test Data Management Solution

Accelario offers a cutting-edge test data management solution tailored to the unique challenges faced by financial institutions, empowering your organization to streamline your testing processes while ensuring compliance and data security.

### Accelario Database Virtualization Solution

Traditional test data management methods often involve creating and managing multiple copies of production databases, leading to significant resource consumption and increased complexity. Accelario's database virtualization solution revolutionizes this approach by providing on-demand, lightweight virtual copies of databases.

#### With Accelario, financial institutions can:

- | Instantly provision virtual database copies for testing, eliminating the need for time-consuming data refresh processes.
- | Reduce storage overhead by up to 70% through efficient database virtualization techniques.
- | Enhance testing agility and accelerate application development cycles.

### Accelario Data Anonymization Solution

Data privacy regulations such as GDPR and CCPA impose strict requirements on handling sensitive customer information. Accelario's data anonymization solution ensures compliance while maintaining the realism and integrity of test data.

#### Key features include:

- | Automated sensitive data discovery and classification.
- | Dynamic data masking and obfuscation techniques to anonymize sensitive information.
- | Control over data masking policies, ensuring compliance with regulatory requirements.
- | Real-time data anonymization for continuous testing environments.

## Why Choose Accelario?

### Enhanced Data Security

Protect sensitive customer information with robust data anonymization techniques, reducing the risk of data breaches and ensuring compliance and other regulatory requirements.

### Accelerated Development Cycles

Streamline the testing process by leveraging lightweight virtualized databases, enabling faster deployment of new features and updates to your applications.

### Cost-Effective

By reducing storage overhead and streamlining testing processes, Accelario helps financial organizations achieve significant cost savings.

### Proven Track Record

Trusted by leading financial institutions worldwide, Accelario delivers reliable and scalable test data management solutions.

### Comprehensive Support

Our dedicated team provides comprehensive support and guidance throughout the implementation and deployment process.

*Accelario shortened our delivery cycle and gave us the agility and flexibility we needed. Their solution dramatically accelerated project delivery, cutting down provisioning times while meeting security and privacy regulations.*

*Emma Sandler*  
DBA Team Leader at the Bank of Jerusalem

## The Accelario Advantage

### Short Onboarding and Implementation Time

Accelario offers a swift onboarding process, allowing your team to quickly integrate and utilize our solutions in your existing infrastructure. The user-friendly self-service portal streamlines tasks, reducing dependency on Database Administrators (DBAs).

### Self-Service Platform

Automate complex DevOps test data management challenges, from database virtualization and data anonymization tools.

### AI-Powered Anonymization & Referential Integrity

Ensure your test data remains secure and realistic with AI-powered anonymization. Preserve referential integrity while swiftly acquiring production-quality data, safeguarding against cyber threats without sacrificing vital relationships.

### Agile Team Empowerment

Provide agile teams with the autonomy to generate virtual test data environments effortlessly, with features like version control, data state rewinding, replication, and sharing across teams.

## Get Started Today

Unlock the power of efficient and secure test data management with Accelario. Contact us today to schedule a personalized demo and discover how we can empower your organization to accelerate innovation while ensuring compliance and data security.

## About Accelario

Accelario has engineered the next generation of test data management technology, enabling teams operating in engineering, DevOps and QA, microservices, ML/AI, and/or cloud-based environments to work more efficiently and effectively. We accelerate application delivery by enabling shift-left testing with AI-powered anonymization, providing high-quality, production-based test data with full privacy compliance leveraging both virtual and physical data technologies at a lower cost. The result is faster and simpler development processes, higher-quality releases, and increased business growth.
