

Accelerate Your SaaS Testing with Accelario

Test Data Management for Software as a Service (SaaS)

Accelario offers cutting-edge solutions tailored for the unique challenges faced by Software as a Service (SaaS) companies in managing test data effectively. Our database virtualization and data anonymization technologies empower SaaS providers to streamline testing processes, enhance data security, and optimize resource utilization.

Database Virtualization for Agile Testing

Traditional test data management methods can be cumbersome and time-consuming. Accelario's database virtualization technology empowers SaaS businesses to accelerate testing cycles by providing on-demand, lightweight copies of production databases. Say goodbye to delays caused by provisioning and maintaining test environments—our virtualization solution enables instant access to realistic datasets for comprehensive testing.

Data Anonymization for Enhanced Security and Compliance

Protecting sensitive customer data is paramount for SaaS providers. Accelario's data anonymization with AI solution ensures compliance with privacy regulations such as GDPR, HIPAA and CCPA. Safeguard your test environments with anonymized data that retains the structure and integrity of original records, enabling robust testing without compromising confidentiality.

Key Benefits of Accelario for SaaS Businesses:

Agile Testing

Rapidly provision test data environments for continuous testing cycles.

Cost Efficiency

Reduce infrastructure costs with lightweight virtualized databases.

Security & Compliance

Ensure data privacy and meet regulatory requirements with anonymized test data.

Improved Product Quality

Thorough testing with real-world data sets leads to enhanced software reliability.

Why Choose Accelario?

Accelario empowers SaaS companies to innovate and deliver exceptional products. Our solutions are designed to optimize testing, stay compliant with privacy regulations, and accelerate time-to-market.

Facing the challenge of transitioning from Actifio's end-of-life support, we turned to Accelario for a comprehensive Test Data Management (TDM) solution. The swift two-week onboarding and implementation showcased exceptional efficiency, setting a new standard in the industry.

About Accelario

Accelario has engineered the next-generation in Test Data Management technology, enabling Software Engineering, DevOps, QA, and Product teams, using a variety of architectures, microservices, ML/AI, cloud, and on-prem environments to work more efficiently and effectively. We accelerate application delivery by enabling shift-left testing with role-based self-service Database Virtualization and AI-powered Data Anonymization, providing high-quality, anonymized, production-based test data with full privacy compliance, distributed to team members on-demand and at a lower cost. The result is faster and simpler development processes, higher-quality releases, and increased business growth.
