

Accelario

Empowering Agile Development Across Industries

At the forefront of cutting-edge test data management solutions, Accelario caters to the unique needs of various industry verticals. From banking to healthcare, manufacturing to media, our services are designed to optimize data security, streamline testing processes, and support rapid innovation. By providing flexible, scalable, and compliant test data management capabilities, Accelario empowers businesses to accelerate their digital transformation while safeguarding regulatory compliance and enhancing operational efficiency.

The Core Benefits of Accelario Next-Gen TDM

Enhanced Data Security

Industry Impact:

In highly regulated industries like banking, healthcare, and insurance, data security is paramount. Accelario's data anonymization capabilities protect sensitive data, ensuring compliance with industry-specific regulations like GDPR, and HIPAA.

Benefit:

Companies can confidently manage and use data in testing environments without risking breaches or non-compliance penalties.

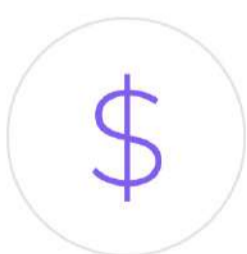

Improved Efficiency

Industry Impact:

Across all verticals, efficiency is critical to staying competitive. For sectors like manufacturing, communications, and retail, where speed and accuracy are essential, Accelario's automated data provisioning and management functions streamline testing processes.

Benefit:

Reduced testing cycle times lead to faster product launches, quicker implementation of new technologies, and overall improved operational efficiency.

Cost Savings

Industry Impact:

Test data management can be costly, particularly in industries dealing with large volumes of data, such as oil & gas, media & entertainment, and retail. Accelario's solutions optimize test data environments, leading to significant savings on data storage and processing costs.

Benefit:

Companies can allocate resources more effectively, reducing the total cost of ownership for data management.

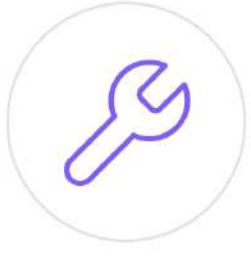

Regulatory Compliance

Industry Impact:

For industries like finance, healthcare, and insurance, navigating complex regulatory landscapes is a daily challenge. Accelario's tailored solutions ensure that companies meet all necessary compliance requirements, whether it's for data privacy, financial reporting, or healthcare standards.

Benefit:

Companies avoid legal risks, fines, and reputational damage while ensuring their test data management processes are audit-ready.

Innovation Support

Industry Impact:

In fast-evolving sectors like technology, private equity, and professional services, the ability to innovate quickly is crucial. Accelario's scalable and flexible test data management solutions support agile development, and digital transformation efforts.

Benefit:

Organizations can stay ahead of the competition by quickly adapting to new technologies and market demands, enabling continuous innovation.

Enhanced Customer Experience

Industry Impact:

For customer-facing industries like retail, hospitality, and media, delivering a personalized and seamless customer experience is key. Accelario's solutions enable companies to better understand and meet customer needs through optimized test data management.

Benefit:

Companies can enhance customer satisfaction, loyalty, and engagement, leading to stronger brand reputation and increased revenue.

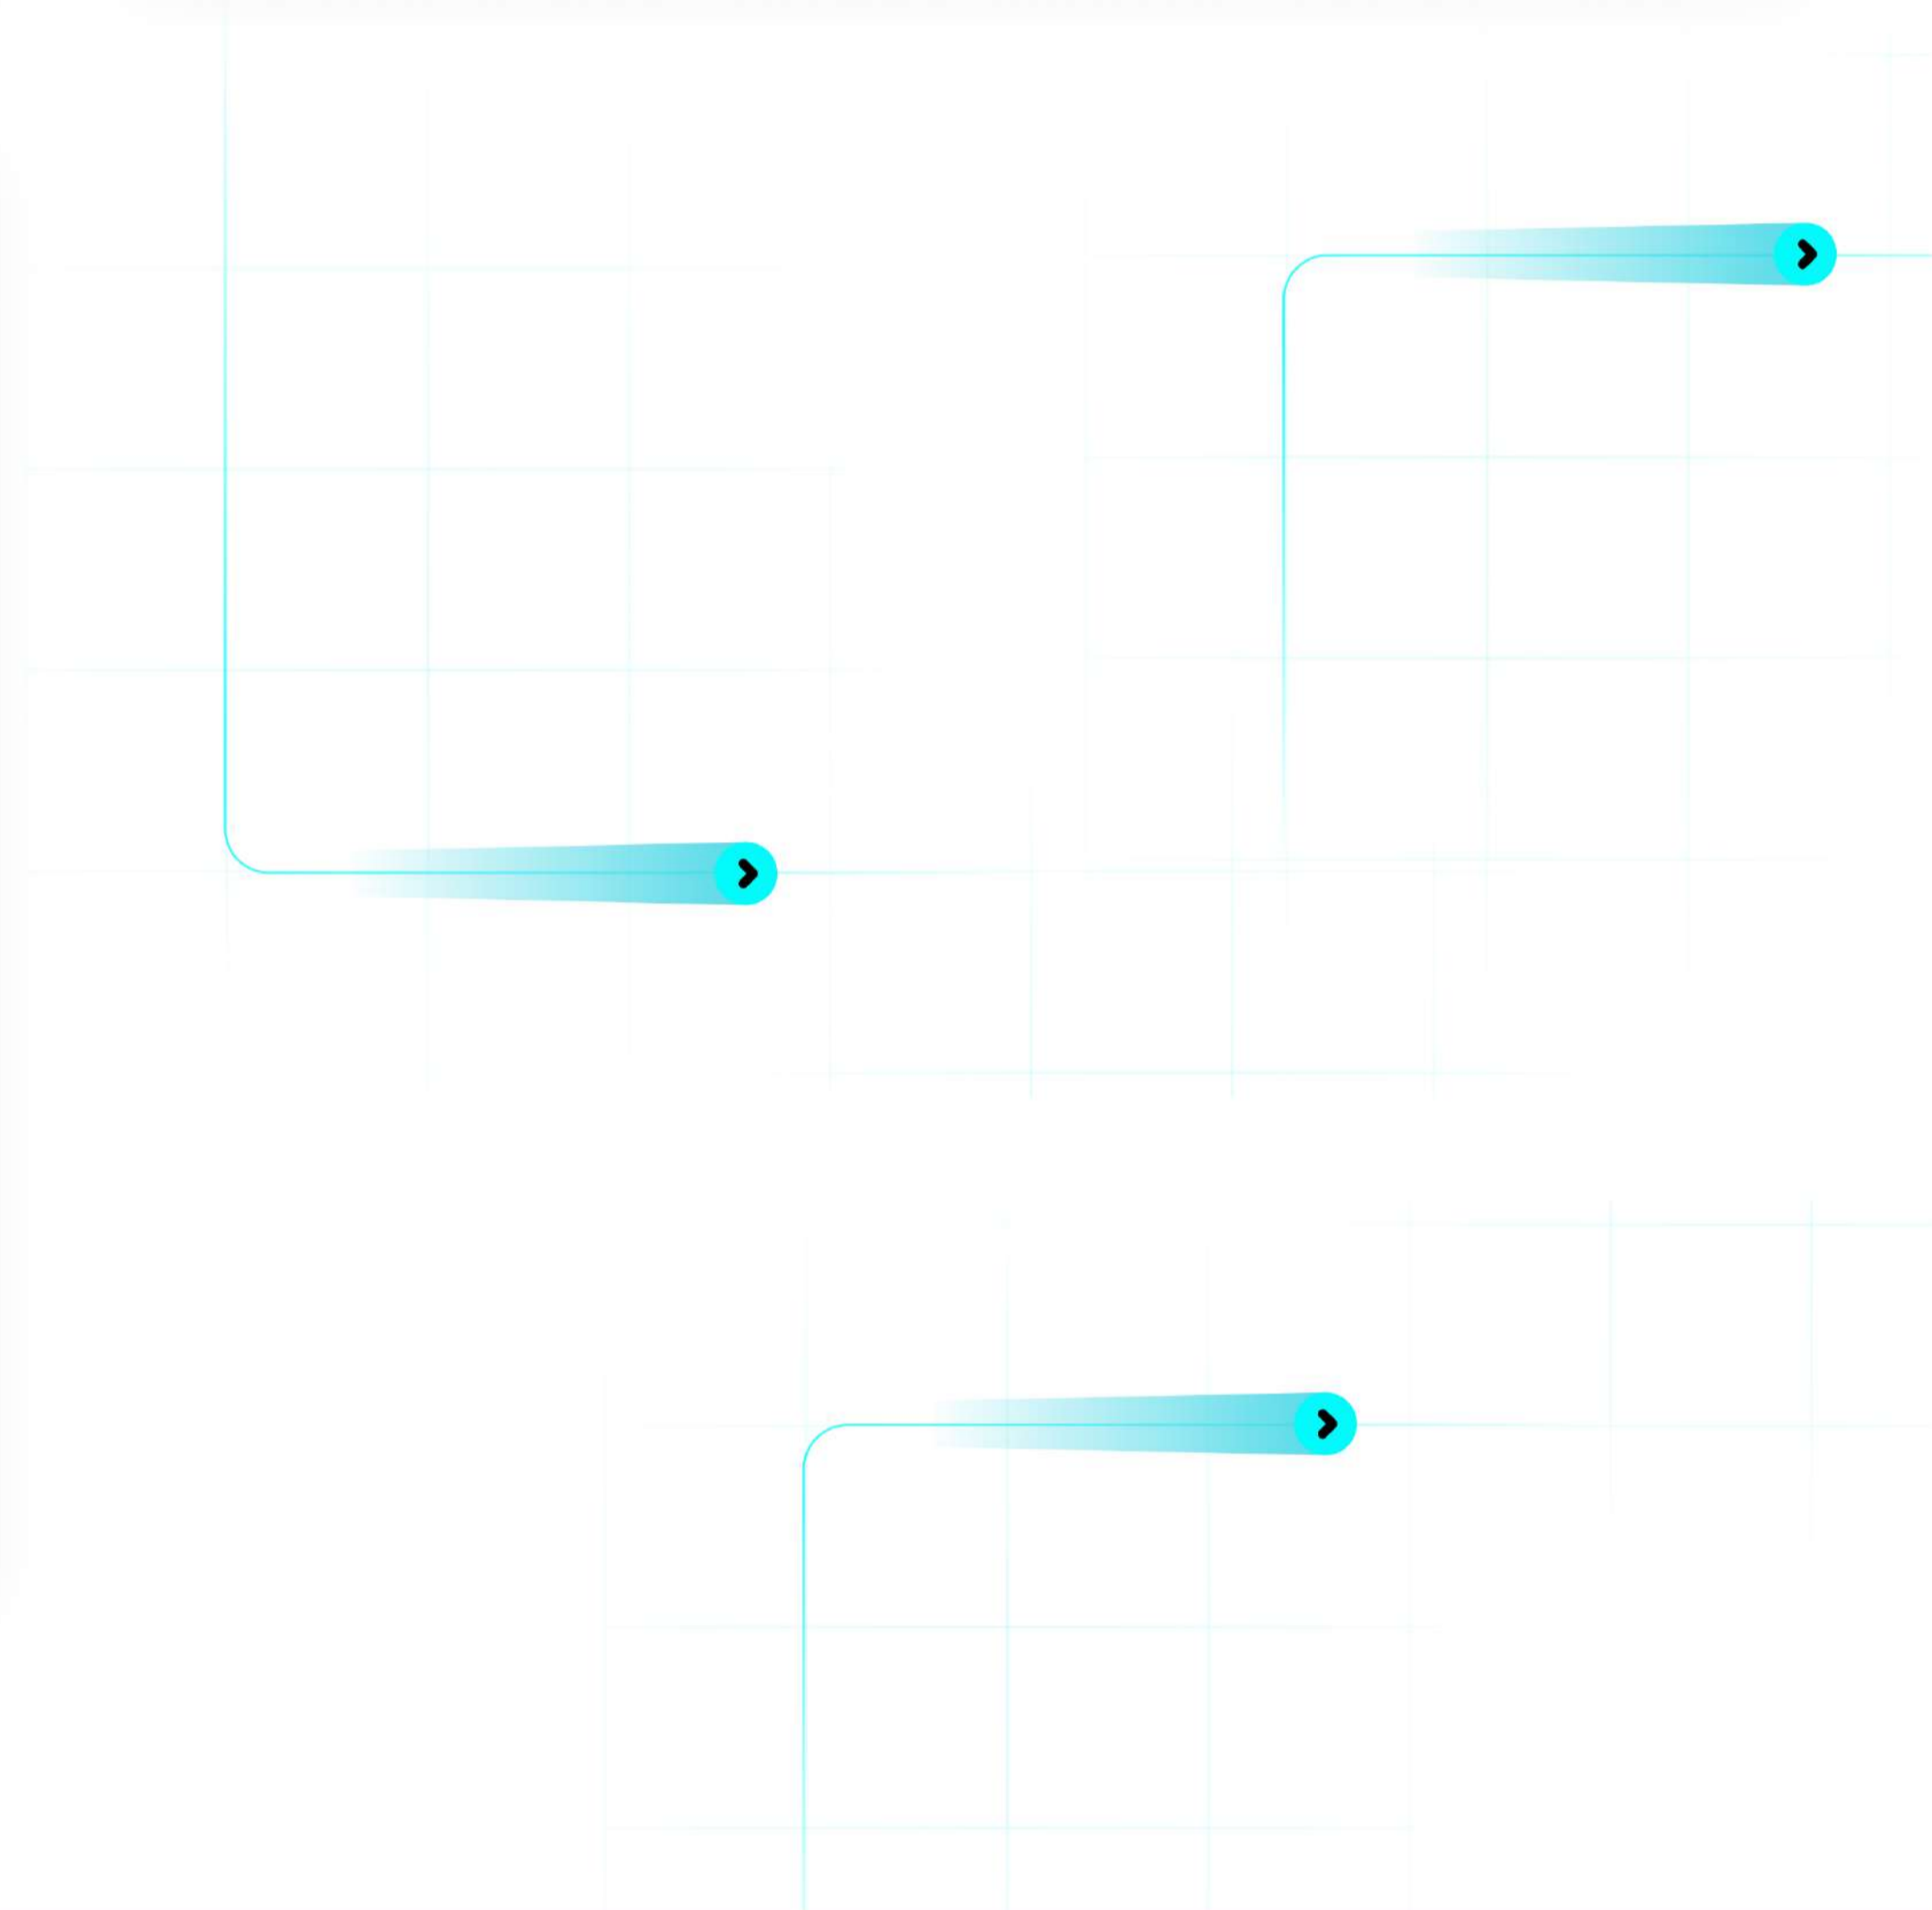

Operational Resilience

Industry Impact:

In sectors like energy, utilities, and logistics, operational resilience is vital to managing complex supply chains and infrastructure. Accelario provides a reliable test data management solution that supports business continuity, and operational stability.

Benefit:

Organizations can maintain high levels of operational efficiency, minimizing downtime and financial loss.

Driving Innovation in Multiple Sectors

Insurance

Migdal

We've seen a dramatic improvement in our operational efficiency. The self-service portal has allowed us to significantly reduce refresh times and increase our delivery speed. Our QA and dev teams couldn't be happier.

Communications

Healthcare & Life Sciences

Energy & Utilities

Agriculture

Grupo G's Spain

Accelarario has revolutionized our approach to test data management, significantly improving our development processes and safeguarding our data privacy. The user-friendly portal and robust data anonymization capabilities have empowered our teams and accelerated our agile CI/CD adoption.

Technology

Tungsten Automation

Facing the challenge of transitioning from Actifio's end-of-life support, we turned to Accelarario for a comprehensive Test Data Management (TDM) solution. The swift two-week onboarding and implementation showcased exceptional efficiency, setting a new standard in the industry.

On24

Accelarario's TDM solution has revolutionized our data management processes, reducing refresh times from days to hours. This transformation has not only improved our operational efficiency but also empowered us to innovate and grow much faster.

Samet

Accelarario aligns perfectly with our commitment to innovation. Its advanced Database Virtualization solution has enhanced our operational efficiency by significantly reducing data refresh times and improving overall performance. This allows us to stay competitive and systematically develop our innovative culture. The seamless integration and exceptional support from Accelarario enables us to maintain our edge and foster continuous improvement.

Banking & Financial Services

Bank Leumi

Accelarario's solution allowed us to overcome data-related challenges that run through DevOps and digital transformation, providing flexibility and self-service efficiency at minimum time making us a high availability performance organization.

Bank of Jerusalem

Accelarario shortened our delivery cycle and gave us the agility and flexibility we needed. Their solution dramatically accelerated project delivery, cutting down provisioning times while meeting security and privacy regulations.

Oil & Gas

Professional Services

Private Equity

Retail & Consumer Goods

Travel, Transportation, Logistics & Hospitality

Media & Entertainment

UPS

If there's one thing I've learned, it's that innovation thrives on collaboration and Accelarario exemplifies this truth remarkably well. Accelarario Database Virtualization and Data Anonymization solutions have seamlessly integrated into our CI/CD pipelines, allowing us to refresh test environments frequently and eradicate bottlenecks. Enhanced data security and compliance ensure we always operate with the latest information. This integration has not only elevated our software quality but also significantly boosted overall dev performance. Accelarario's pioneering approach to test data management is a paradigm shift in the industry.
